Bachelor of Arts (Honors) in Economics

2016

RESEARCH FIELDS

Development Economics, Family Economics, Public Economics

JOB MARKET PAPER

A House for Two : Empowering Women with Property Rights

Abstract: Formal property ownership may not empower women unless it is understood by those they interact with. I study the effect of improving awareness about property rights on women's empowerment through a field experiment in rural Maharashtra. I work in a setting where after a recent policy change married women are documented owners but only 26% believe they are. I randomize an awareness campaign across 1,783 households that informs both spouses that women co-own their property and delivers a physical copy of the ownership document. The campaign improves knowledge that women hold property rights, increases expenditure on women-specific goods by 40%, and reduces men's alcohol consumption by 33%, though it has no overall effect on domestic violence. I develop and test an intrahousehold bargaining model, which highlights that the effect of the campaign may differ when the woman already knows but the spouse does not, and where neither know. Consistent with the model's predictions, the strongest consumption effects are observed in households with the lowest initial beliefs about women's ownership, while reductions in domestic violence occur in households where the husband's initial beliefs are lower than the wife's. This study highlights how shifting beliefs about women's rights is essential to realizing the full impact of large-scale government programs.

WORKING PAPER

How do political connections affect property tax compliance? with Aneesha Parvathaneni

Abstract: How does being connected to a local elected leader affect property tax compliance? Using a close election difference-in-discontinuities design, we quantify the effect of being connected to a local elected leader on tax liability and compliance. We use novel administrative data on property taxation from an Indian district and find that citizens connected to local elected leaders are 45 percentage points more likely to remit taxes and remit 351% more in taxes. We also find that these results are partially driven by enforcement as those who are connected are 30.8 percentage points more likely to face fines and face 247% more in fines. Among those who are connected to the local elected leader, we find that these results are driven by poorer property owners.

FIELDWORK
EXPERIENCE

Running a randomised control trial (RCT) in India to study the impact of land ownership on women's empowerment. *May 2023-present*

Conducted a household-level survey on women's bargaining power across 30 villages, covering 150 households in Pune, India. *October 2022*

Surveyed the workers of the informal wire stripping industry in Seelampur, Delhi. *March 2015*

Surveyed the workers of the informal garment sector in Kapashera, Delhi. *December 2013*

ACADEMIC
PRESENTATIONS

European Association of Young Economists Annual Meeting *2024*

Imperial College PhD Conference *2024*

NBER Summer Institute *2023*

14th Annual Conference on Economic Growth and Development *2018*

4th Annual Center for research on the Economics of Climate, Food, Energy and Environment (CECFEE) Research and Policy Workshop *2018*

12th South Asian Economics Students' Meet *2016*

TECHNICAL SKILLS

STATA, R, Python, L^AT_EX

LANGUAGE SKILLS

English (Fluent), **Hindi** (Native Speaker), **French** (Intermediate) and **German** (Beginner)
